## Education

2018 - 2022

**Computer Science (Bsc)**

**University of Miskolc**

## Language

**Hungarian - Native**

**English - B2**

## Work experience

**Dec. 2023 - Present**
OTP Bank Nyrt.
### Application Operations Engineer

- Operate and support business-critical banking applications running on Linux (RHEL), Windows Server, Apache Tomcat and IIS environments.
- Coordinate production releases, deployments and emergency changes.
- Perform incident, problem and change management activities within SLA requirements using ServiceNow and Jira.
- Participate in application migration and modernization projects.
- Execute disaster recovery testing and business continuity activities.
- Create and maintain technical documentation, operational runbooks and disaster recovery procedures.
- Develop automation scripts using PowerShell and Bash.
- Monitor application health, availability and performance through enterprise monitoring dashboards and observability platforms.
- Collaborate with development, infrastructure, database, network and security teams to ensure service reliability and operational excellence.
- Troubleshoot application, infrastructure and connectivity issues through log analysis, monitoring data and root cause analysis.

**Jul. 2023 - Dec. 2023**
MOL IT & Digital GBS Kft.
### IT Business Application Operation Expert

- Operated and supported approximately 10 business applications throughout their lifecycle.
- Managed incidents and change requests in accordance with SLA requirements.
- Standardized operational processes to improve service quality and implementation efficiency.
- Collaborated with cross-functional teams to implement IT changes aligned with business requirements.
- Supported application deployments, maintenance and day-to-day operational activities.

**Aug. 2022 - Jul. 2023**
MOL IT & Digital GBS Kft.
### Front Office Associate

- Provided first-line IT support for software, hardware and network-related issues.
- Troubleshot technical incidents and documented resolutions in ticketing systems.
- Performed workstation maintenance, software deployment and upgrade activities.
- Collaborated with infrastructure and support teams to resolve operational issues.
- Gained hands-on experience in enterprise IT operations and incident management.

**Sep. 2021 - Aug. 2022**
MOL IT & Digital GBS Kft.
### IT Trainee

- Provided technical support for end users.
- Assisted in troubleshooting hardware and software issues.
- Supported infrastructure maintenance activities.
- Participated in IT projects and operational tasks.

## Certifications

- **Microsoft Certified: Azure Fundamentals (AZ-900)**

## Professional Development

- **AZ-104 Azure Administrator Training**
- **Docker and Kubernetes Administration**
- **PeopleCert DevOps Fundamentals**
- **Jenkins CI/CD Training**
- **Bash Scripting and Linux Administration**

## Information Technology Skills

**DevOps & Cloud:**
- Kubernetes, Minikube, Docker, Docker Compose, Terraform, Microsoft Azure, Helm

**CI/CD & Version Control:**
- GitHub Actions, Jenkins, Git, GitHub

**Monitoring:**
- Prometheus, Grafana, Alertmanager

**Systems & Automation:**
- Linux, RHEL, Windows Server, PowerShell, Bash, Python

**Servers & Databases:**
- NGINX, Apache Tomcat, IIS, PostgreSQL, Microsoft SQL Server, Oracle SQL

**ITSM:**
- ServiceNow, Jira

## Projects & Portfolio

GitHub: github.com/benceurikovacs
Portfolio: benceurikovacs.com

**DevOps Demo Application**
Implemented a containerized Node.js application with an automated CI/CD workflow using Docker, GitHub Actions, Azure Container Registry, Azure App Service and Azure Key Vault.

**Docker Multi-Container Platform**
Built a multi-container application environment using Docker Compose with an NGINX reverse proxy, Node.js backend, PostgreSQL database and Grafana monitoring.

**Kubernetes Homelab**
Deployed a multi-tier application to a local Kubernetes cluster using Minikube, Kubernetes Deployments, Services, Secrets and a PostgreSQL StatefulSet.

**Terraform Infrastructure Automation**
Designed and provisioned Azure infrastructure using Terraform and Infrastructure as Code principles, including resource groups, networking components and cloud resources.

**Kubernetes Monitoring Stack**
Added Prometheus and Grafana monitoring to the Kubernetes environment and created a dashboard for CPU and memory usage of the application Pods.
